Student Worksheet: Understanding College Types

Objective: Students will distinguish between different types of colleges in order to identify which of the California public institutions offer the education level aligned to their career interests.

Warm-Up

— Make a list of colleges. Think about local colleges, colleges your friends and/or family have attended, and well-known colleges.

Two-Year and Four-Year Colleges

— Sign in to **CaliforniaColleges.edu** and read Types of Colleges.

— Sort the following list of colleges into the **Two-Year Colleges** and **Four-Year Colleges** charts:

- California Community College
- Oregon Community College
- California State University
- Stanford University
- University of California
- Harvard University

	Two-Year Colleges	
	In-State	**Out-of-State**
Public		

	Four-Year Colleges	
	In-State	**Out-of-State**
Public		
Private		

Career and College Connection

— Navigate to **My Plan** at the top of the page and click on **My Career Plan**.

— Identify the primary **Education Level** for at least three favorited (❤) careers, then determine which California public institution offers that type of degree.

Career Select from your favorited careers.	**Education Level** Choose the first level that is listed. That is the most common education level for each career.	**California College** What type of California public institution offers this type of degree: CCC or CSU and UC?
