Student Voices: How Amber used CaliforniaColleges.edu. Transcript

Narrator: Student Voices: How Amber used CaliforniaColleges.edu.

Amber: My name is Amber Flores and I graduated from Heritage High School. I'm currently attending Mt. San Jacinto Community College and my major is nursing. Going into application process, I was a little scared it was going to be new to me. I know since I had been in AVID, we had been preparing ourselves for it. But actually getting to that part of having to apply was scary. With the help of CaliforniaColleges, we were able to make it a little bit easier to transition and apply to schools.

Narrator: The website is shown highlighting different aspects available, such as My Plan, College, Career, and Financial Aid.

Amber: CaliforniaColleges was actually a pretty big help in my applying process. I had initially joined the website in 2018 for my first year of AVID, and we were introduced to career surveys. So we would go in there and we would fill out all this information and it would match careers that they think best fit like their personalities. And a lot of them I got were medical related, which I was fairly happy about.

Narrator: Career interest tools are shown, including Interest Profiler, Work Values, Intelligence, Personality, and Skills. My Career Plan shows a career list, assessments, and top careers.

Amber: And once I was actually applying to schools, it was really easy to apply to my CSUs because it just imported all of my grades from there onto the CSU application, which was so easy compared to the UC application because I had to manually go and input everything. But once I was able to just login through my CaliforniaColleges, into my CSU application, it just inputted everything. Like it had all of my grades on there automatically, and I just didn't even have to worry about it.
